

KYSER MUSICAL PRODUCTS

Kyser®

Kyser and you. Together we'll make beautiful music.

Our company was founded upon a love of music and especially music made on and accompanied by guitars. Every one of our products embodies this devotion. We hope you'll try them all, knowing that they come from people making products that help you make beautiful music.

The Kyser Quick-Change Capo. America's Favorite

While the Kyser Quick-Change Capo clamps firmly for on-pitch intonation, you can quickly and easily release it and slide it up or down – or remove it in seconds without disturbing the tuning. Made of strong light-weight aluminum, the Quick-Change is designed to be operated comfortably with one hand and never interferes with your fingering. Available in 6 String, 12 String, Classical, Drop "D", Electric and Banjo/Mandolin versions.

Short-Cut™ Capo. NEW!

Designed with an open Bass E and shortened pressure arm for alternative tuning. A must have for the imaginative musician looking for new and experimental applications.

Pro-Am Capo.

Preferred by many professional and recreational guitarists. The Pro-Am is the lowest price mechanical capo on the market. Durable rubber sleeves won't mar or react with finish and are replaceable.

Kyser PowerCore™ Guitar and Electric Bass Strings

We researched musicians' string performance standards then worked this information into a line of high-quality strings that produce rich, brilliant tones. Kyser's PowerCore line includes four gauges of phosphor-bronze wire wound on hexagon core strings for acoustic guitars, three gauges of nickel-plated steel for electric guitars, and two for electric basses. The two classical guitar models are polychromatic trebles and silver-plated wound bass strings.

String lubricant/Cleaner. Lubricating and cleaning strings not only prolongs string life against skin acids and other wear, but makes for easier fingering. Kyser Dr. Stringfellow lubricant/cleaner is safe for any wood finish.

Lem-Oil. Formulated for fingerboards and other oil-finished wood surfaces, Kyser Dr. Stringfellow Lem-Oil cleans, polishes, preserves and protects against drying, cracking and wear and tones down scratches and blemishes. Contains no waxes or synthetics.

Best Guitar Polish. This deep-cleaning polish protects wood finishes and even improves playing ease. It will not streak and contains no camuba wax.

Kyser's Lifeguard® Humidifier

Prolonged exposure to too-dry or too-damp climates can cause loss of resonance and shorten the life of your valuable guitars. Easily installed and removed from the sound hole, Lifeguard Humidifiers regulate the humidity inside the instrument. The Lifeguard absorbs excess moisture in damp conditions, and humidifies in dry conditions. A smart, inexpensive way to protect the investment you've made in your guitars.

Kyser Old Style Finger Picks

Slipping our Old Style picks on your fingers is like coming home: comfortable, adjustable, contoured for most effective string attack, knurled to stay put even during the fastest licks, Kyser Old Style picks produce big, round, brilliant tones. Hand-made of German (nickel silver) silver to last and last.

CAPOS
