## NEW YORK series

The NEW YORK series of cabinets is named after the big city where bassists often take the subway or a taxi to gigs. If your situation is anything at all like theirs, you need a small, light cabinet that doesn't compromise sound quality or power handling!

Markbass combos are made using the same cutting-edge technology and top-quality components as the separate heads and cabinets. Some manufacturers treat combos as amps for beginners, but there are no corners cut here and the same quality standards apply to all of our products.

# COMBOS

## CMD series

The CMD series of combo amps changed the market forever. Never before have bassists been able to get such great tone and volume from such light and portable combos. Many people find that the clarity and power of these combos make them suitable for all kinds of gigs, and adding an external cabinet, you can fill a large venue with headroom to spare.

## MM series

Having a great tone is important for beginners and professional players alike. Despite their diminutive size, the Micromark 801 and Minimark 802 combos efficiently reproduce a wide range of frequencies with a professional sound... the MM series of combos are not only a practice amps, they can also be used for small gigs and recording!

## CMD JB Players School series

The CMD JB PLAYERS SCHOOL combo, named after Jeff Berlin's Music School, is the perfect choice for students... We know how important it is for them to have a compact, light and portable combo, to practice and play with a professional sound. This combo is a smart choice which satisfies all the above requirements. It's also inexpensive, but features the same quality standards applied to all of our products.

# BLACKLINE

The BLACK LINE series of cabinets is a very smart, inexpensive product line, created with the same quality control tests applied to all of our products, directly followed by our technicians during the production.

Every Markbass head amp has been carefully designed to give all bassists great sound quality, advanced technology and lightweight!

# HEADS

LITTLE MARK III

LITTLE MARK  
TUBE 800 / 500

LITTLE MARK  
ROCKER 500

## LITTLE MARK series

Little Mark family heads are enormously popular due to their compact size, light weight and warm natural sound!

## BIG BANG

The Big Bang once again raises the bar for bass amp heads. Despite its diminutive size, it delivers an impressively huge, warm tone!

## TTE 500 / 800 Randy Jackson signature

"Modern Vintage" may seem to be an oxymoron, but it sums up the unique TTE 500/TTE 800 amps well. Current technology is brought together with classic tone concepts in a head that looks and sounds vintage—but features some special adaptations of the Markbass innovations that put the brand on the map!

MOMARK BLACK  
500 / 800

The MoMark Black amplifier heads are a versatile, professional amps for any musical situation. Thanks to its tube preamp, these heads sound warm and reproduce any instrument's harmonics beautifully, and, as always, they are very light in weight.

## Everything a bass player needs and wishes, easy to use.

**Bass MULTIAMP**  
**Bass MULTIAMP S**

We're proud to introduce the BASS MULTIAMP which offers to the bassists the same advantages of the guitar version with an incredible wide range of virtual bass amps, both modern and vintage, studio and stompbox effects, speaker cabs and microphones and a powerful amp... in a practical rack mountable unit! The BASS MULTIAMP features an interface very easy to use as for the guitar version, and a 500W power amp. 105 Factory presets for bank (thanks to Markbass Artists Paolo Costa, Cesare Chiodo, Lorenzo Feliciati, Steve Lawson, Maurizio Rolli, Pierluigi Mingotti for their precious collaboration). This is just the beginning... BASS MULTIAMP's state-of-the-art design allows for continual expansion... Since we were BORN TO RUN, our team will continue to work hard to periodically release new firmware updates, new items, and more and more useful and exciting tones and effects. We want only the BEST for our customers!

The Markbass effect pedals have been designed to give bassists some very practical and useful tools. All our pedals feature "true bypass": that means that when the pedal is 'off', your signal goes directly from the input jack to the output jack without any degradation of audio quality.

# EFFECT PEDALS

## Super Synth

The top bass synth pedal on the market is incredibly versatile thanks to its software that lets customize your sounds to perfection.

## Compressor

This full-featured tube compressor pedal has set a new standard for bass compressors.

## Bass Tube Marker

A simple, great-sounding bass distortion pedal, great for adding grit and bite to your sound or extra thickness for solos. Runs on 9V, 12V, or 9V battery.

## Markbass MB Octaver

This compact analog octaver lets you add one and/or two octave-below doubles to your sound for added intensity and funkiness. Runs on 9V, 12V, or 9V battery.

## MB7 Distorsore

This flexible, compact distortion pedal combines a wide range of distorted sounds, from natural, sweet overdrive to very aggressive distortion. The handy 7-band graphic EQ gives you precise control of your distorted bass sounds.

## MB7 Booster

This pedal has a cool, compact design and combines a useful clean boost—very handy for helping you stand out when taking a solo—with a 7-band graphic EQ, to tailor your bass tone to perfection!

## MB Mini Dist

Based on the Markbass Bass Tube Marker, the MB Mini Dist offers a variety of improvements as well as two tone controls to customize your grit. A mini pedal with maximum distortion!

## MB Mini Boost

Give your pedalboard a "boost" with the MB Mini Boost—which also features our Variable Preshape Filter (boosts lows and highs, and cuts mids).

Markbass offers a wide range of useful accessories, as the **Bass Keeper** which allows you to safely store your bass against the side of your amp instead of bringing with you a guitar stand; the **Mark Stand** that allows you to angle your cabinet upwards in "monitor" position; the **Markbass Covers** which gives you a lightweight but effective way to protect your cabinet or combo from wear and tear and the elements; the premium-quality **Markbass Amp Bags** that allows you to easily transport your amp and that also provides protection wherever you go; the **Rack Ears** kits, the **Footswitches**... and more!!!
